

Grace Fellowship Snow Blowing Instructions

Update 2/1/2017

Thank You for your willingness to help keep the snow off the walks around the church! It is greatly appreciated.

To get into the church garage contact the church office for the key code.

We have 2 snow blowers. A New Toro (4 cycle with electric start) and a newer generic 2 stage (4 cycle with electric start). 95% of the time you will use the Toro.

To start the Toro Turn the switch on and pull out the choke, which is a big gray lever that sticks out towards you on the bottom back of the unit. Pull it out (Towards You) press the primer a couple times turn on the switch and pull the rope. This unit is also an electric start so if you have problems plug it in and use the electric start. (It's a lot easier!)

Gas (unleaded) is in containers by the snow blowers. IF you need gas either let the church office know and someone will get it for you in the next day or so OR get it yourself and submit the bill to the church office and you will be reimbursed.

You are responsible to clear just the sidewalks around the church building. We don't do the walks across Williston or Minnesota. The parking is done by others.

Area Details:

The sidewalks across the back (alley) of the church. It is also helpful if you can clear about 1 pass IN FRONT of the sidewalks also if the plows have not come through because they cannot get that close.

The sidewalks and entry on the Minnesota side

The sidewalks and both entries (Main and office) on the Williston side

The path from the parsonage to the church on the west side.

The main concern is to have the walks cleared before any church activities. Normally that would be Wednesday nights and Sunday Morning. If it snows between those times it is not as critical that you get over there and clean up. The staff will normally clean the walk from the office door out to Williston and the back door. Others may see that the walks are not done and do it for you so if you are coming in you might want to call the office to make sure someone hasn't already did it!

If you have any problems with gas, the blowers or anything please let the church office know so we can get it taken care of.
